### Detailed Action

The Terminal Disclaimer over US Patent 6,071,742 has been received, is acceptable and has been entered.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 16-24 and 30-31 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19, 22 and 25-30 of U.S. Patent No. 6,323,024 (hereafter the '024 patent). Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims recite attenuated CBV genomes which encode and express cytokines such as IL-4 and IL-10. The claims in the '024 patent recite CBV vectors with the same characteristics, i.e. the CBV can be a CBV3 genome, the same nucleotide substitutions at positions 233, 234 and 236, the same changes to the 5' untranslated region of the virus, cloning sites at the same positions in the genome, etc. While some claims in the '024 patent read on CBV expression of any heterologous gene, other claims recite

Art Unit: 1636

expression of any cytokine and claim 30 in the '024 patent specifically recites expression of IL-4 or IL-10.

This rejection is maintained. Applicants, in the response, filed 3/19/04 indicate that they have submitted a Terminal Disclaimer to overcome the rejection, but no Terminal Disclaimer over US Patent 6,323,024 has been scanned into the file. Until a suitable Terminal Disclaimer is received, the rejection will be maintained.

Any rejection not repeated in this Office Action is withdrawn.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
